

A photograph of a waterfall cascading over mossy rocks. The water is white and frothy as it falls, creating a misty spray at the base. The surrounding rocks are dark and covered in vibrant green moss. The background is dark, making the waterfall and the moss stand out.

RIGHT ACTION IN THE FACE OF RUNAWAY CLIMATE CHANGE...

The ***root of Climate Change*** is not carbon;
It's the destructive nature of thought itself
I divide myself falsely from the world.
Everything 'other' *I ignore, or fear,*
or seek to control, or destroy
Our war against ourselves & Nature
only ends with a revolution
of thought and consciousness.

DIPPER FALLS, above Cliff River, flowing into the South Fork of the IMNAHA
