

## LOSS OF TRUTH?

With any culture, the loss of truth is a sure and certain sign of portending collapse. When they tell you **the water is good**, when **the water is bad**, and that **the food is good**, when **the food is bad**, and that **they kill only in self-defense**, when they stage the attacks—*ruthlessly*—themselves, then we can never say for sure how much longer **Nemesis**—will hold her  
...breath...

Pure, clear, mountain water, touchstone of the sacred, source of shared spiritual excellence in the great commons of both **NATURE'S & CULTURE'S** trust.
